e//Jewelry® POS

e-Jewelry Software®

Specifically designed for Jewelry Manufacturers, Wholesalers, Retailers, Diamond & Gem Traders

Built on Microsoft Dynamics® 365 Business Central, e-Jewelry® Software addresses all the jewelry and diamond related needs in what we believe to be one of the most innovative and technologically advanced jewelry business management interface.

It's widely used in it's space as a go-to ERP solution for small, medium & large jewelry manufacturers, wholesalers and retailers as well as Diamond & Gem Traders that demand jewelry and diamond specific features and functionalities, company wide automation with built-in financials and seamless integration to productivity software such as Microsoft (Office) 365, Shopify for eCommerce and Salesforce for CRM.

If you are a jewelry manufacturer, a wholesaler or a retailer, or if you are a diamond or a Gem trader and your business is growing, then e-Jewelry Software can definitely help you.

Microsoft Dynamics 365

The Complete Global ERP Solution for your growing Business

Microsoft Dynamics 365 Business Central (Formerly Navision or Dynamics NAV) is the number one mid-range Enterprise Resource Planning (ERP) software in the world.

As of 2022, Microsoft Dynamics 365 Business Central had clocked in over 200,000 installations (over 3 million users), in over 142 countries supported by a global network of over 4,500 Microsoft partners.

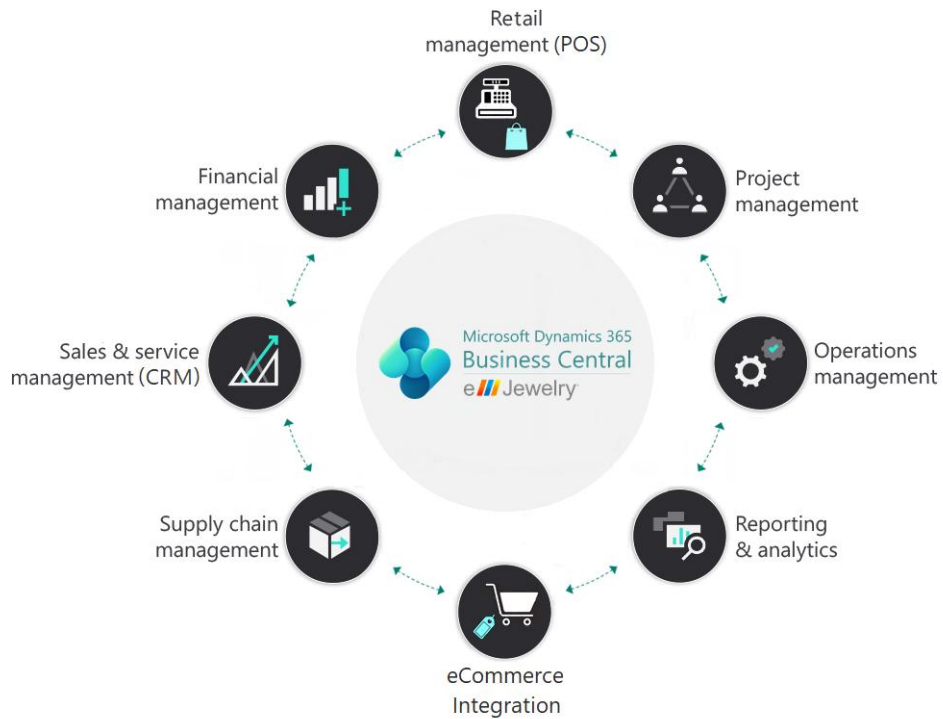

Deploy in the cloud with Microsoft Dynamics 365 or on your servers on-site, the choice is yours.

With Microsoft Dynamics™ 365, Microsoft is bringing digital transformation to life for your business.

Now you can run your entire business from end to end with intelligent applications that seamlessly work together in the cloud—unifying the capabilities of CRM business software and ERP systems.

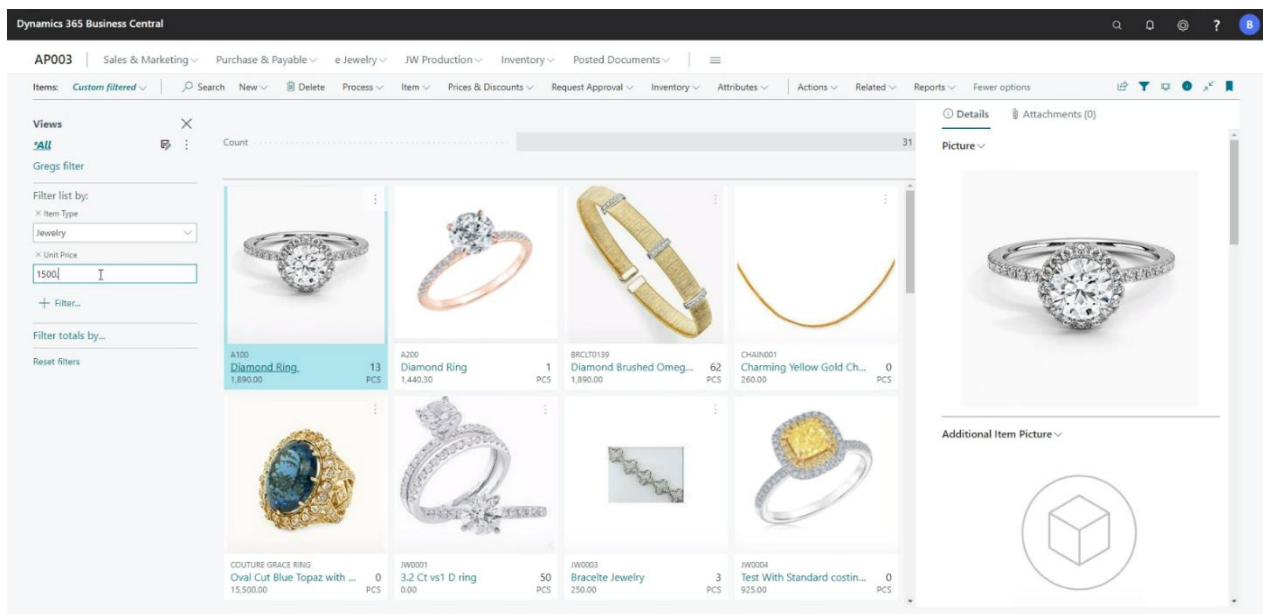

Microsoft Dynamics e-Jewelry Integrated Database

Why You Should Use e-Jewelry Software on Microsoft Dynamics?

- ❖ Because you are outgrowing your basic accounting software or your outdated/legacy system.
- ❖ You currently have multiple, disconnected systems that create inefficiencies and information silos.
- ❖ You currently have basic systems can't keep up with increasing demand and more complex business processes.
- ❖ With your current software, Inaccurate reports and lack of insight negatively impact customer interactions & sales
- ❖ Lack of audit trails and security features puts your business at risk
- ❖ With your old software, pressure to keep the business running creates a reactive approach to technology

The e-Jewelry® Point of Sale

Specifically designed for Jewelry Retail Stores Operations

The pandemic forced many retailers to rethink almost everything related to the customer purchasing experience. Where and how to pick up and return their purchased items? How can they pay? What is the utility of a store in an online-first shopping environment, etc.

Microsoft is answering these questions in ways that will reverberate through the industry beyond the pandemic.

Built on Microsoft Dynamics® 365 Business Central, The e-Jewelry® Point of Sale extends Microsoft Dynamics 365 Business Central ERP offering advanced retail features like,

POS & Store operations, Inventory management, Loyalty, eCommerce integration, etc. The Solution helps to equip retailers with flexible, unified and seamless buying experience for customers and business partners. Business can engage across traditional and emerging channels, allowing consumers the option to buy when, how, and where they want—on any device—by delivering a consistent experience across online & offline channels.

The e-Jewelry® Point of Sale focuses on:

- Quick & Fast Checkout
- Speeding up POS ticket sale
- Speeding up Special order processing
- Speeding up repairs order Tracking
- Manage & process online orders
- Enhance communication with Customers
- Flexible returns & repairs
- Contactless payments
- Omnichannel retail experience
