

Dynamics 365 Business Central On-Premises Device License

With the Business Central device license, multiple users can access a licensed device with individual sign-ins without the need for individual user licenses. Aside from that, multiple users can use a single device that is licensed to operate as a point of sale, shop floor, warehouse, or store manager device. A single device can provide any of the following functionalities in any combination.

Device License	Functionality
Point of Sale	One device located in the commerce location, used by any individual, for completing customer-facing sales of goods or services transactions
Store Manager	<p>One device located in the commerce location, used by any individual, dedicated to performing the following tasks solely for that commerce location. Commerce location or store means a physical location (static or itinerant) operated by you when closing goods or services transactions with customers:</p> <ul style="list-style-type: none"> • Managing and replenishing inventory • Balancing cash registers and processing daily receipts • Configuring and maintaining menu options displayed by the ISV devices • Purchasing supplies and services required to run the commerce location operations • Managing commerce location staff • Processing reports required to analyze and manage commerce location results • Managing master data related to commerce location operations
Shop Floor	<p>One device used for manufacturing the following shop-floor functions:</p> <ul style="list-style-type: none"> • Clock-in and clock-out • Starting and finishing production jobs (including project activities carried out on the shop floor) • Reporting progress • Materials consumption and completion • Viewing documents and instructions related to production jobs • Viewing worker holiday balances
Warehouse Device	<p>One device used for warehousing functions:</p> <ul style="list-style-type: none"> • Receiving • Putting away • Doing internal stock transfers • Picking and packing • Capturing product attributes • Shipping goods, plus performing inventory count checks in the context of a warehouse management system • Posting output and materials consumption against production orders when captured as transfers of raw materials and finished goods between a warehouse and a production line (All other types of transactions are excluded.)
