

# Dynamics 365 Business Central On-Premises Device License

With the Business Central device license, multiple users can access a licensed device with individual sign-ins without the need for individual user licenses. Aside from that, multiple users can use a single device that is licensed to operate as a point of sale, shop floor, warehouse, or store manager device. A single device can provide any of the following functionalities in any combination.

Device License	Functionality
<p><b>Point of Sale</b></p>	<p>One device located in the commerce location, used by any individual, for completing customer-facing sales of goods or services transactions</p>
<p><b>Store Manager</b></p>	<p>One device located in the commerce location, used by any individual, dedicated to performing the following tasks solely for that commerce location. <b>Commerce location</b> or <b>store</b> means a physical location (static or itinerant) operated by you when closing goods or services transactions with customers:</p> <ul style="list-style-type: none"> <li>• Managing and replenishing inventory</li> <li>• Balancing cash registers and processing daily receipts</li> <li>• Configuring and maintaining menu options displayed by the ISV devices</li> <li>• Purchasing supplies and services required to run the commerce location operations</li> <li>• Managing commerce location staff</li> <li>• Processing reports required to analyze and manage commerce location results</li> <li>• Managing master data related to commerce location operations</li> </ul>
<p><b>Shop Floor</b></p>	<p>One device used for manufacturing the following shop-floor functions:</p> <ul style="list-style-type: none"> <li>• Clock-in and clock-out</li> <li>• Starting and finishing production jobs (including project activities carried out on the shop floor)</li> <li>• Reporting progress</li> <li>• Materials consumption and completion</li> <li>• Viewing documents and instructions related to production jobs</li> <li>• Viewing worker holiday balances</li> </ul>
